Assembly Instructions

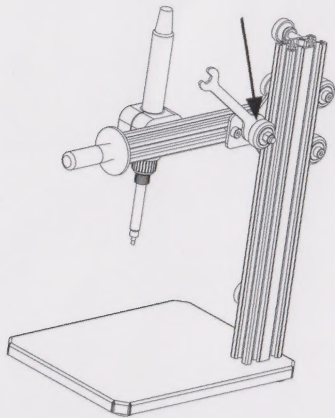

Step1: Fix the 2040 profile with M5 * 16 on the base plate

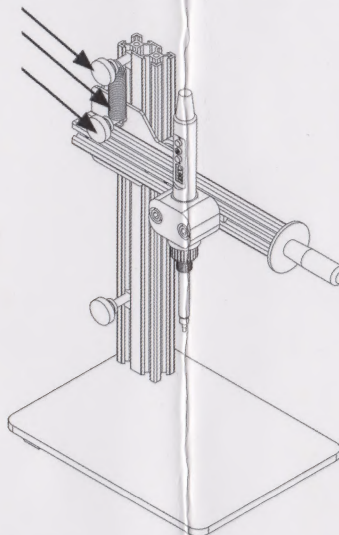

Step2: Fix the 2020 profile on the sliding assembly with M5 * 16 screws

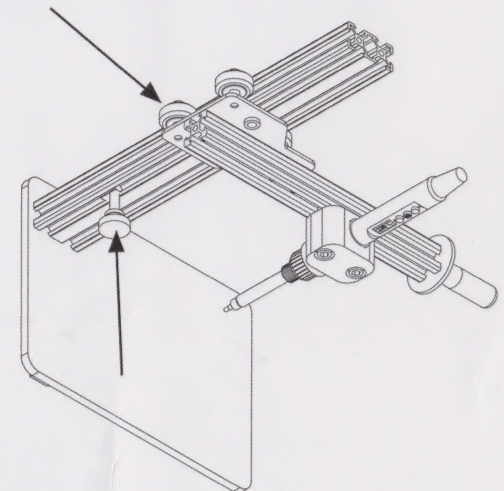

Step3: Install Soldering Iron and handle

Step6: To avoid damaging the wheel during assembly, it is necessary to adjust the tightness of the wheel, after installation to prevent it from swinging.

Step5: Installing tension spring

Step4: First install the set screw to the 2040 profile
Then, install the third step assembly into the 2040 aluminum
